

FACE VISOR

ARTICLE CODE: SFS 400

- Poly carbonate helmet attachable clear face visor.
- Spring type attachment.
- Fits with most helmet.
- Ratchet type fittings adjustment.
- Standard: EN 166

Purpose:

Face shields provide a barrier to protect the face and eyes from potential hazards like flying particles, sparks, and chemical splashes.

Application:

Metalworking: Grinding, cutting, operations.

Construction: Protecting workers from debris and sparks.

Other: Used in various industries where there's a risk of eye and face injury.

Warning: it's crucial to wear safety eyewear underneath the visor during grinding, cutting, brazing, and similar operations to ensure comprehensive eye protection from harmful rays, sharp objects, and particles.
